## PROJECT PLAN

05190000081 - Safiye Defne Kargı  
05200000034 - Muhammet Şancı  
05190000104 - Hazal Karataş  
05200000761 - Berat Duran

# INTRODUCTION

Gettick, new event management system is a comprehensive platform designed to streamline the planning, organization, and ticketing of events. This system will provide event organizers and attendees with a seamless experience, offering a wide range of features to enhance event management.

In this project plan; there are task management table, gantt chart and network diagrams for clear vision of work flow. There is a work division plan for efficient sharing of workload and risk analysis plan to create a strong foresight.

First Meeting

# DIVISION of LABOR

## PROJECT MANAGER

HAZAL KARATAŞ & SAFİYE DEFNE KARGI

Responsible for overseeing the entire project, including planning, scheduling, and coordination of team members. Will also be in charge of risk management and ensuring timely delivery.

## UI/UX DESIGNER

MUHAMMET ŞANCI & SAFİYE DEFNE KARGI

Responsible for creating wireframes, mockups, and user interface designs. Ensures a visually appealing and intuitive user experience.

## FRONTEND DEVELOPER

HAZAL KARATAŞ & SAFİYE DEFNE KARGI

In charge of creating the user interface and ensuring a seamless user experience. Will also handle the integration of design elements and user interactions.

## BACKEND DEVELOPER

MUHAMMET ŞANCI & BERAT DURAN

Responsible for designing and developing the backend of the system, including server-side (!) logic, and integration with external services.

## QUALITY ASSURANCE TESTER

MUHAMMET ŞANCI & BERAT DURAN

Responsible for testing the system to identify and report bugs, ensuring the functionality and performance meet the specified requirements.

## CONTENT WRITER

BERAT DURAN & HAZAL KARATAŞ

Responsible for creating and edits content for event descriptions, announcements, and other communication materials in the platform.

# RISK IDENTIFICATION

Risk Description	Probability	Seriousness
<b>1. Technical Complexities</b> Development delays or technical issues may arise.	Moderate	Serious This could lead to project delays or glitches during events.
<b>2. Security Breaches</b> Security vulnerabilities may lead to data breaches.	Low	Catastrophic Could result in loss of user data and damage to the reputation.
<b>3. Payment Issues</b> Integration problems with payment gateways.	Moderate	Serious Could lead to payment processing errors and financial losses.
<b>4. Low User Adoption</b> Users may not adopt the platform as expected.	Moderate	Serious Could result in low ticket sales and revenue.
<b>5. Venue Related Issues</b> Venue-related complications like changes or cancellations.	Low	Serious May require adjustments and cause inconvenience to attendees.
<b>6. Communication Issues</b> Failure to communicate important event updates.	Low	Serious Could lead to confusion or dissatisfaction among attendees.
<b>7. Mobile App Compatibility</b> Issues with the compatibility of the mobile app on various devices.	Low	Serious May lead to poor user experience and negative reviews.
<b>8. Lack of Feedback</b> Low participation in post-event surveys and lack of feedback.	Low	Tolerable May result in limited feedback but not significant harm.
<b>9. Staff Illness &amp; Motivation</b> Issues with team health and general motivation.	Low	Tolerable This could lead to project delays or glitches during events.

# RISK ANALYSIS

## Risk Mitigation Plan

### 1. Technical Complexities

Conduct thorough research and feasibility studies before implementation. Utilize proven technologies and frameworks. Allocate additional time in the schedule for troubleshoot.

### 2. Security Breaches

Implement robust security protocols and encryption techniques. Regularly conduct security audits and penetration testing. Stay updated with the latest security practices.

### 3. Payment Issues

Choose reputable and reliable payment gateway providers. Implement thorough testing of payment processing workflows. Provide clear instructions for payment-related issues.

### 4. Low User Adoption

Conduct market research and user surveys to understand user needs and preferences. Implement a robust marketing and user acquisition strategy.

### 5. Venue Related Issues

Maintain open communication with venue management. Have contingency plans for alternate venues or event formats.

### 6. Communication Issues

Implement regular status meetings and communication channels. Use collaboration tools for seamless information sharing.

### 7. Mobile App Compatibility

Conduct extensive testing on various devices and platforms. Utilize responsive design techniques for optimal mobile performance.

### 8. Lack of Feedback

Implement feedback collection mechanisms within the platform. Proactively seek user input through surveys and user testing sessions.

### 9. Team Illness & Motivation

Ensure that team members have a basic understanding of each other's responsibilities. Set realistic deadlines with buffer time to accommodate unexpected absences. Encourage team members to prioritize their health and well-being.

# CONCLUSION

Gettick, the event management aystem aims to revolutionize event planning and ticketing, providing a comprehensive platform for organizers and attendees.

Through careful planning, division of labor, and risk analysis, we are confident in delivering a high-quality system that meets the specified requirements within the designated timeline.

---

(!) Some of the tasks, roles and risk doesn't really valid for this particular school project, but we thought like we are doing a real life software project, planning and analysis; that's why we included every aspect.
